

Bio Sketch for Rachel Cunliffe

What area of statistics do you work in?

- Teaching statistics to first year students
- Statistics and the media
- Teaching and technology

What areas of statistics do you follow from a purely interest standpoint?

- Infographics/statistical displays
- Media presentation of statistics

What were your best and worst subjects at school?

Best was maths, worst was probably PE!

When you decided you wanted to be a statistician and why

I always liked maths but really loved the practical applications of statistics which I discovered in my final year at high school through doing a project on how effective speed cameras were.

What training (degrees and subjects) you've done

BSc (Hons)

Majored in statistics and studied pure maths and computer science as well.

What do you do for fun?

I love taking photos, travelling and designing things.
