

Bio Sketch for Mike Langston

What area of maths do you mostly work in?

Analysis of Algorithms

Tell us a bit more...

My team designs and synthesizes high performance methods and implementations for analyzing heterogeneous high throughput biological data.

What areas of maths do you follow from a purely interest standpoint?

Combinatorics, graph theory.

What were your best and worst subjects at school?

Best was probably mathematics. Also physics and chemistry.

Worst was probably Russian. And, gulp, biology! .

When you decided you wanted to be a mathematician and why

Mathematics was my favorite subject in high school. It has been ever since.

What training (degrees and subjects) you've done

BS Mathematics

MS Information Science

PhD Computer Science

Most interesting place you've travelled with your research

New Zealand (of course!).

If you follow sport, what sport, and which team - if not, why not?!?

American Football. All teams.

Mike Langston
